

CIMS Light

Data Management Software for Cemeteries

Product Order Form

Contact Name _____ Title _____
 Company Name _____
 Street Address _____
 City _____ State _____ ZIP _____
 Phone _____ Fax _____ Email _____

With both the Desktop and Cloud versions of CIMS Light, you can start the process of computerizing your cemetery records, knowing that your data is safe, easily accessible, and always available. With CIMS Light Desktop, the software runs directly on your personal computer so you are always in full control over where your data is stored, backed up, and even when it's upgraded. One license is required for each computer on which you'd like to install CIMS Light Desktop. With CIMS Light Cloud, you access your cemetery data live on the internet. For CIMS Light Cloud, one license equals one login, so a separate login is required for each person you'd like to be logged in at one time.

Circle which version would you like: **CIMS Light Desktop** **CIMS Light Cloud**
